Lawyers from China and Italy talked together - the activity of "Interpretation of Chinese Investors' Investment Law in Italy" was successfully held

Author： Link & King

On the afternoon of December 2, 2025, the China Investment Legal Interpretation Dialogue for Investment in Italy, hosted by Link&King, was successfully held. The event was chaired by Lawyer Yuan Dujuan and aimed to provide Chinese enterprises and investors with cutting-edge legal and practical guidance for entering the Italian market. Three lawyers from the Italian Zunarelli Law Firm were invited to attend and engaged in in-depth discussions with Link&King Senior Partner Lawyer Wang Junling, Dr. Xu Cong from the Shanghai University Law School, and other colleagues from Link&King.

Founded in Italy, Zunarelli Law Firm has offices in Bologna, Rome, Milan, and Shanghai, and has long focused on areas such as cross-border investment, maritime law, corporate compliance, and dispute resolution. The firm also has a legal technology department that provides compliance support for applications of new technologies such as blockchain, AI, and big data. With extensive experience in international trade and foreign direct investment, the firm can offer comprehensive legal solutions similar to in-house legal services, and has rich experience in negotiating and drafting agreements in investment and M&A transactions.

Lawyer Yuan Dujuan pointed out that, against the dual backdrop of globalization and economic structural transformation, Italy has become an important choice for Chinese enterprises in their international expansion. This dialogue not only built a platform for exchanges between Chinese and Italian legal practitioners but also provided Chinese enterprises with a systematic, reliable, and practical guide for investing in Italy. Chinese lawyers attending the event indicated that the interpretation helped them gain a clearer understanding of Italy's investment environment, industry opportunities, and legal pathways, and that they would further advance related market research in accordance with

the characteristics of their own business.
